

Q Health

CASE STUDY

PROJECT OVERVIEW

Q Health is an amazing rehabilitation center that supports and promotes a multidisciplinary Service Delivery Team of expert behavioral healthcare professionals with a passion for delivering high-impact, successful behavioral health services. What this means is that we work with each individual to create the best course of treatment for the greatest chance of success.

The Q Health team got in touch as they wanted an integrated sign and visual communication solutions for their new flagship facility in West Palm Beach.

After a comprehensive survey and discussions with their team, we broke down the project in three different parts:

- Outdoor Signage
- Interior Wayfinding & ADA Signs
- Lobby Sign & Decorative graphics

This allowed us to break-down the design and material needs according to functionality and aesthetics, while bringing the message and branding Q-Health wants to bring across to their customers and associates.

It was a fantastic opportunity to work with such a great organization and be part of the process to make their space that bit more amazing.

PROJECT GALLERY

SERVICES

- Consultancy
- Site survey
- Original artwork designed
- Production and installation

MATERIALS
